

PRESENTS: SPEAKER DON JOHNSON, PHD

Don Johnson has two PhDs, one in Chemistry and the second in Computer and Information Sciences. He has been a Professor at a number of universities while also serving as an accomplished research scientist. He once was a strong defender of evolution and an old earth, but now sees them as incompatible with the understanding of most of the evidence. The evidence better aligns itself with the Biblical description of creation. He is the founder of Science Integrity and has several websites including <http://4iam.org> which we encourage you to check out.
